Summary

Result-driven **Fullstack/Frontend Engineer** with 7+ years of experience building scalable web and mobile applications across financial tech, mortgage, insurance, e-commerce, and enterprise environments. Experienced contributing to core digital products at **PT Asuransi Jiwa Astra (Astra Life)** through **PT IBM Delivery Indonesia & PT Vajiro Mulia Gemilang**.

Strong expertise in **React JS, Angular JS Next.js, Flutter**, and modern JavaScript frameworks with a solid foundation in backend integration. Proven track record of delivering high-impact features, improving UI/UX performance, and collaborating with cross-functional teams in fast-paced agile projects.

CORE SKILLS

Frontend: React.js, Next.js, Vue.js, AngularJS, Flutter

Mobile: Flutter, Apache Cordova

Backend: Laravel, CodeIgniter, Spring Boot Java

Tools: Git, Jira, Spira, Figma, Postman, REST API

Other: UI/UX collaboration, performance optimization, agile/scrum development, waterfall

Experience

PT. IBM Delivery Indonesia & PT.Vajiro Mulia Gemilang (Onsite at PT Asuransi Jiwa Astra)
Application Developer (September 2024 – August 2026)

- Developed and enhanced key modules for **ILoveLife**, **IProsper**, and **AstraLifeGO** insurance applications.
- Improved UI consistency and performance across web and hybrid app platforms.
- Worked closely with product owners, backend engineers, and QA to ensure smooth delivery cycles.

PT. Bringin Inti Teknologi / BRIIT (Intiland Tower Jakarta Pusat)

Middle Frontend Engineer (August 2022 – August 2024)

- Built new features for the **Homespot.id Mortgage Ecosystem** using **React** and **Flutter**, supporting BRI's digital mortgage workflow.
- Improved app responsiveness and stability, reducing bug reports in key modules.
- Collaborated with PM, TL, BE, QA, and UI/UX teams in an agile development environment.
- Performed routine maintenance and bug fixing for both web and mobile applications.

PT Bisnis Integrasi Global (Sign House), Jakarta Selatan

Web Developer (April 2021 – June 2022)

- Developed the **DNR Plus** e-commerce platform frontend using **Vue.js**, **React.js**, and **Next.js**.
- Built the DNR Plus **Admin CMS**, improving product management workflows.
- Developed the **Omnichannel Marketplace Connector** interface using React.js.
- Maintained the **PCR Express Clinic Test Information System** using CodeIgniter.

PT Atap Teduh Lestari, Jakarta Timur

IT Staff (Mar 2017 – Dec 2020)

- Developed the company profile website and maintained its data content.
- Built a guestbook application for exhibition events.
- Created a product requirement calculator to support the sales/marketing field teams.
- Troubleshooting device.

Education

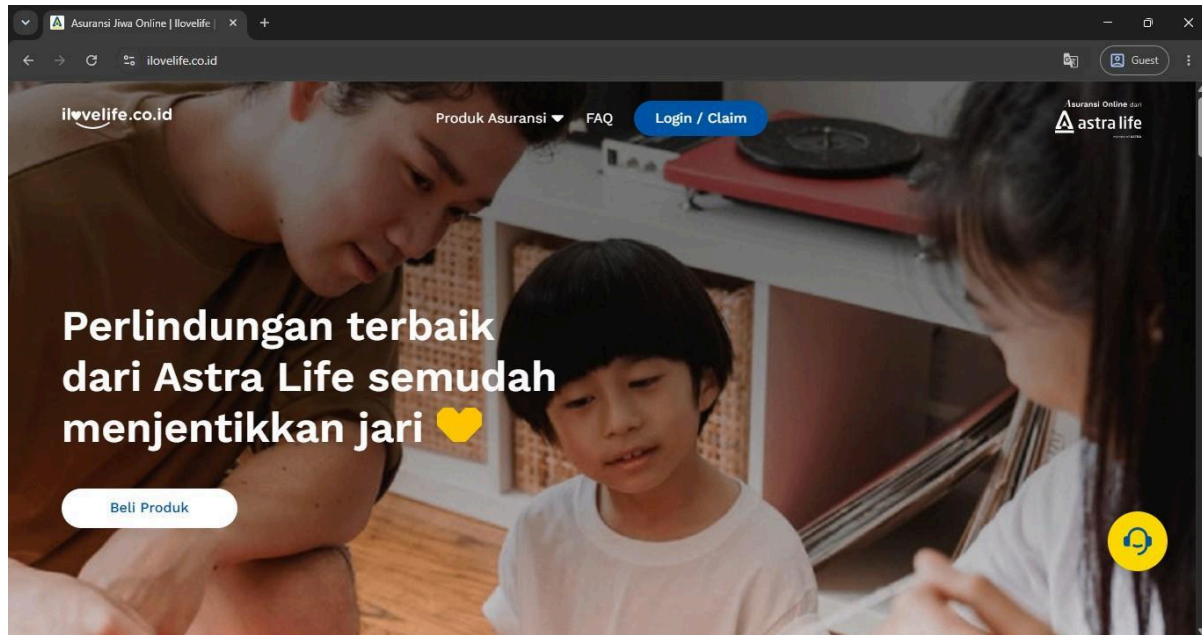

STMIK LPKIA Bandung (2012-2017)

Bachelor of Informatics Engineering · GPA 3.85 · 2012 – 2016

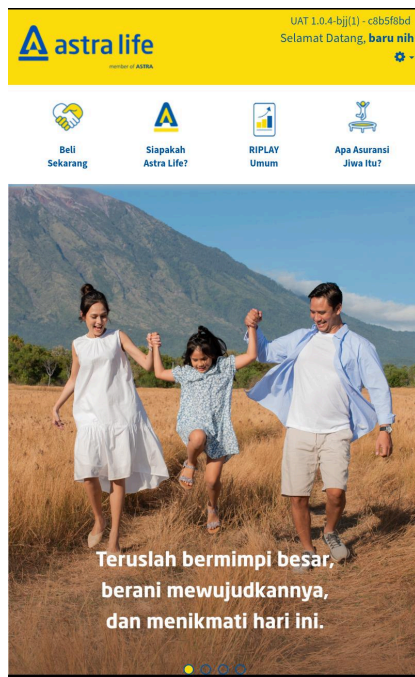

- Participated in the University student orientation organizing committee as a medical division member in 2013.
- Participated in a student activity unit focusing on creativity as the division head during the 2014-2015 period.

Application Portfolio

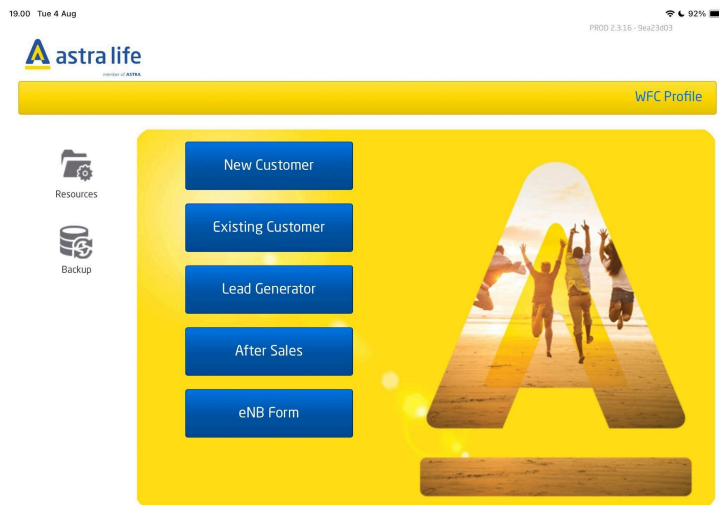

- ilovelife.co.id Contributed to the development and integration of the **Flexi Life Plus** insurance product on the website, including product features and user flows, while also maintaining and improving other existing insurance products.

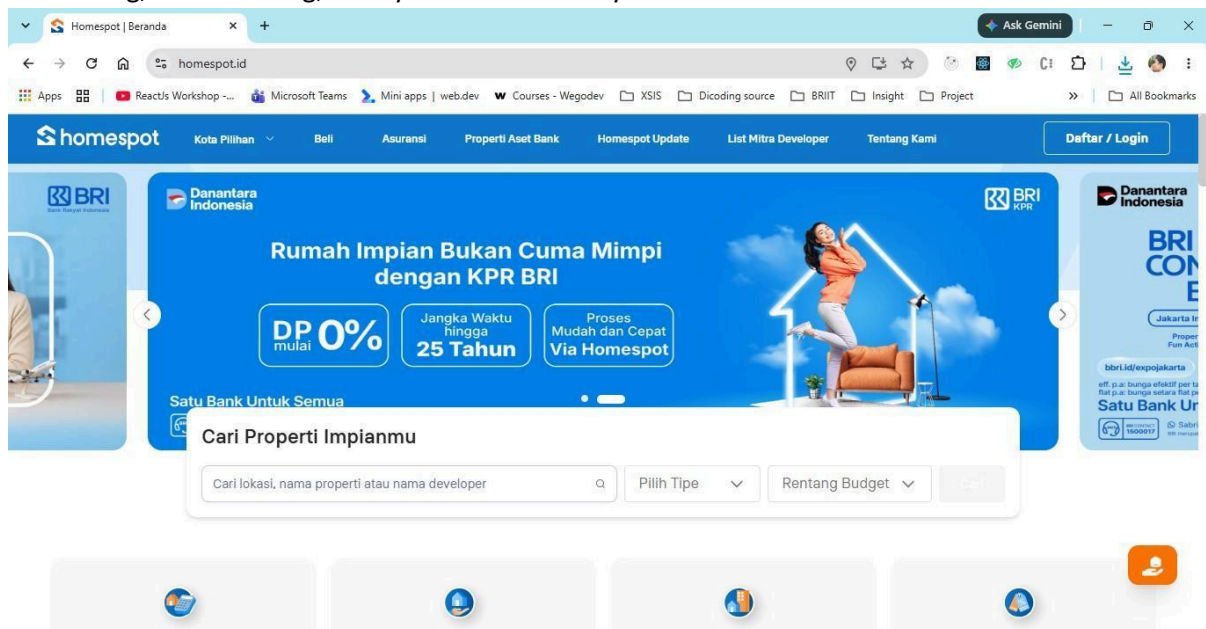

- Contributed to the development and maintenance of the **Astra Life GO** mobile application using **Angular JS** and **Cordova**. Implemented the new **AVA iPro Terjamin** insurance product and updated product descriptions and policy documents to comply with **POJK** regulations. Managed and maintained multiple application versions for **PermataBank**, **Bank Jasa Jakarta**, and **iOS** device.

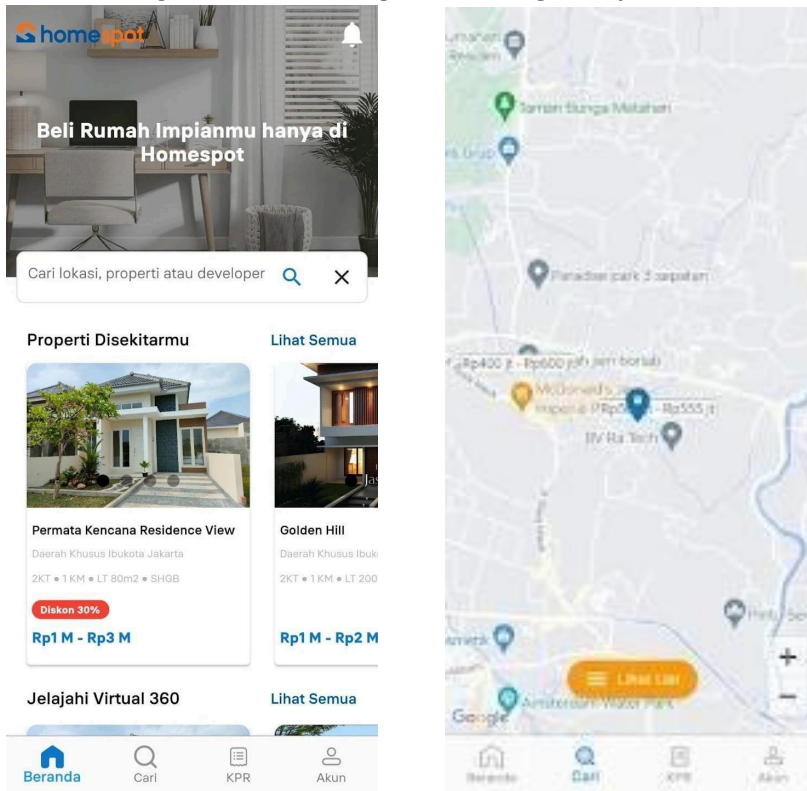

- Contributed to the development and maintenance of the **iProsper** mobile application, including the implementation of new insurance products such as **AVA Proteksi Penyakit Kritis** and **AVA Infinite Prestige**. Updated product descriptions and policy documents to comply with **Peraturan Anggota Dewan Komisiner (PADK)** regulations.

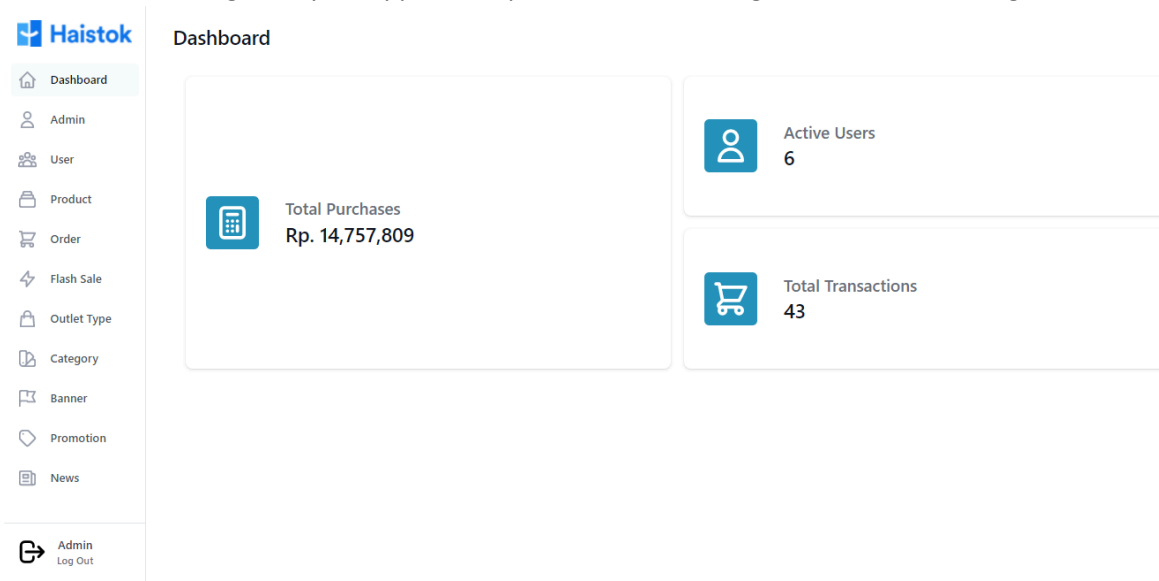

- Contributed to the development of the **Homespot Website** using **ReactJS**, implementing various features and system integrations, including **BRI Core for mortgage (KPR)**, **BRI Insurance** and **BRI Life insurance products**, and **BRI Property auction systems**. Developed using **Atomic Design** and **Redux** for state management, along with various React third-party libraries. Homespot Website is monitored using Datadog for application performance monitoring, error tracking, and system observability.

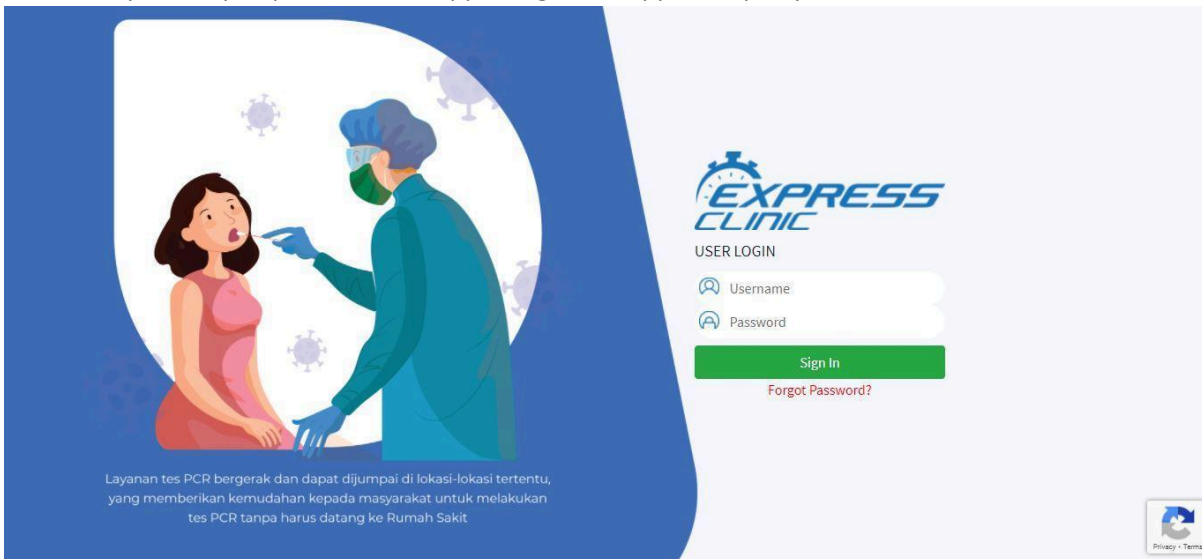

- Contributed to the development of the **Homespot Mobile** application using **Flutter**, built from scratch and published on both the **Google Play Store** and **Apple App Store**. Implemented features using **BLoC state management**, **Google Maps**, and other supporting libraries.

- Haistok web-based marketplaces built with ReactJS and TypeScript for managing marketplace content and data. Haistok consists of an e-commerce frontend for customers and a CMS for administrators to manage marketplace data and content. The e-commerce platform is monitored using Sentry for application performance tracking and error monitoring.

- A web-based PCR, antigen, and antibody test management system for Express Clinic, built with CodeIgniter, supporting patient registration, test result uploads, payments, and test result delivery directly to patient whatsapp using whatsapp third party libraries.

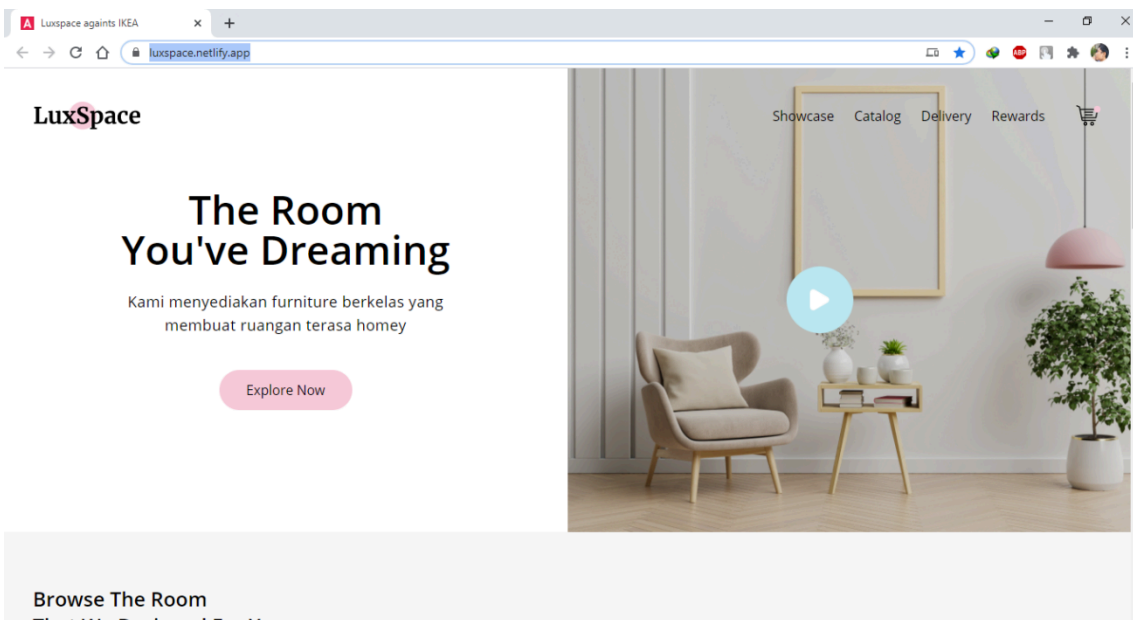

- E-commerce Application “DNR Plus; a Vue.js e-commerce frontend using Axios to consume APIs, featuring product browsing, product details, cart management, and checkout.

- A multilingual company profile website for PT Atap Teduh Lestari, built with PHP and CodeIgniter, featuring product catalogs, project galleries, product documents, company information, and live chat. Includes a separate admin panel for managing website content.

- A web-based e-commerce landing page prototype for Luxspace, featuring product details and shopping cart functionality. Accessible at <https://luxspace.netlify.app/>

- An Android guestbook application for office exhibitions, featuring guest and sales data management, guest details, CRUD functionality, and data backup in Excel and photo formats.
